Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Withdrawal of allowability of claims

1. The indicated allowability of claims 21-40 is withdrawn in view of the newly discovered reference(s) to Determan (US 4 310 143). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elsenbacher (US 5 713 331) in view of Determan (US 4 310 143). Elsenbacher discloses a hydraulic system located between an injector and a braking system. However, Elsenbacher does not show the use of a control valve has a three stops to distribute the fluid. Determan shows that the provision of a multi stops to distribute the fluid is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by determan would have been recognized in the pertinent art of Elsenbacher. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Elsenbacher with the multi stops in the hydraulic system as taught by determan.
